TRIGEO SIM CAPTURES “BEST OF SHOW” AWARD AT MIDSIZE ENTERPRISE SUMMIT

TriGeo Wins an Unprecedented Three Awards at the Conference Including “Best Midmarket Software Solution” and “Best Execution of a Midmarket IT Solution”

POST FALLS, ID, October 10, 2006 – TriGeo Network Security, a leading provider of security information and event management (SIEM) solutions, announced that TriGeo SIM won an unprecedented three awards, including the prestigious “Best of Show” award, at the recently-held Midsize Enterprise Summit in Phoenix September 17-20.

TriGeo SIM also won the award for Best Midmarket Software Solution and the coveted award for Best Execution of a Midmarket IT Solution. Produced by Vision Events®, a Gartner, Inc. (NYSE: IT) company, Midsize Enterprise Summit is focused exclusively on the technology needs of midsize businesses and attracts CIOs and senior IT executives from companies across a wide range of industries.

These prestigious awards are voted on solely by the attending Senior IT Executives and winning an award signifies the attendee’s recognition of the company’s product excellence and commitment to the midmarket.

“The IT Executives attending the Summit reviewed products and presentations from over 50 vendors,” said Charles Badoian, Sr. Global Director, Gartner. “They vote for the solutions that they are most likely to buy and use. We congratulate TriGeo Network Security and the company’s Security Information Manager for its outstanding showing at our Summit.”

“We are very pleased to have won three of the most prestigious awards at the Gartner Midsize Enterprise Summit. TriGeo’s mission was to create a world-class solution, specifically for the midmarket” said Michelle Dickman, President and CEO, TriGeo Network Security.

This latest accolade follows recent industry recognition for TriGeo SIM including an *SC Magazine* “Best Buy” which it received for the second consecutive year. In awarding their highest possible rating, in a comparative review of major security information and event management systems, the editors cited TriGeo’s power, flexibility and innovation.

The TriGeo SIM was designed to help mid-market enterprises gain visibility into their organization’s network. TriGeo’s SIM is designed to help enterprises meet regulatory requirements through reporting and analysis that supports the IT security, audit and compliance functions. Real-time security incident analysis and response derived from the TriGeo SIM’s automatic reporting function makes it an ideal security management tool for IT security organizations that need rapid responses to both internal and external security issues.

About TriGeo Network Security

Formed in 2001 as the pioneer and leader of Automated Remediation through Intelligent Correlation™, TriGeo protects the entire network – from perimeter to endpoint. With more than 40,000 nodes deployed, TriGeo Network Security is the leading provider of information and event management technology for mid-market enterprises.

The TriGeo Security Information Manager is the only network security appliance that automatically identifies, notifies and responds to network attacks, suspicious behavior and policy violations. With patent-pending technology for real-time log analysis, event correlation, automatic alerts and policy-based active response, TriGeo provides an innovative network defense technology through a complete security information management (SIM) solution.

TriGeo is privately-held with headquarters in Post Falls, Idaho. For more information, visit the company’s website at www.trigeo.com or call (208) 664-7000

About The Midsize Enterprise Summit

Midsize Enterprise Summit brings together senior IT executives at midsize companies with Gartner analysts and technology vendors focused on the challenge of developing effective IT strategies and utilizing emerging technologies. More information on this Summit is available on the Web site at <http://www.midsizeenterprise.com>.
