

## **TriGeo Receives Info-Tech Decision Diamond Award**

### **Award Win Marks Third Industry Analyst Nod in Six Months**

**POST FALLS, Idaho (November 13, 2007)** — TriGeo Network Security, the proactive network defense company, received an Info-Tech Research Group Decision Diamond Award for Security Information Management (SIM) Solutions. Info-Tech positioned TriGeo as a “Competitor,” based on the ease of use, pricing and product architecture of TriGeo SIM™, the most widely deployed SIM solution across mid-market enterprises.

“As security and compliance concerns continue to mount, the applicability of SIM solutions to the mid-market is growing,” said James Quin, senior research analyst with Info-Tech Research Group. “By providing an inexpensive, appliance-based solution, TriGeo delivers a platform that is remarkably easy to set up and use -- a definite advantage in small enterprises that have limited staff available.”

The Decision Diamond award recognizes vendors that provide products and services of outstanding quality, with a strong enterprise strategy and high levels of customer satisfaction and retention. TriGeo’s software helps hundreds of companies protect their networks and ensure strong regulatory compliance. Its solution is ideal for mid-sized businesses with limited IT resources, helping them monitor network activity in real time, automatically identify potentially harmful behavior, and actively respond to internal or external threats.

“Auditors want to know that organizations can analyze network log data and enforce proactive measures to protect sensitive information – not just that they capture logs,” said Michelle Dickman, president of TriGeo. “Our solution is a cornerstone in that effort, digging into network activity at the click of a mouse to find botnets, policy violations and blended attacks – at a fraction of competitors’ prices.”

This award designation comes on the heels of analyst firm recognition from Gartner and Frost & Sullivan, further highlighting TriGeo’s SIM innovation and market leadership of delivering strong security solutions tailored to mid-tier organizations.

TriGeo SIM is the only real-time security information and event management appliance that automatically identifies, notifies and responds to network attacks, suspicious behavior and policy violations in real time, based on hundreds of pre-built and customized correlation actions. The company’s mid-tier focus provides businesses with tailored, affordable solutions that fit network configurations and IT staffing needs, while offering total network monitoring of potential insider and hacker attacks. This approach gives businesses the ability to quarantine, block, route and control services, processes, accounts and privileges.

**About Info-Tech Research Group**

With a paid membership of over 21,000 worldwide, Info-Tech Research Group ([www.infotech.com](http://www.infotech.com)) is the global leader in providing tactical, practical Information Technology research and analysis. It is one of North America's fastest growing full-service IT analyst firms.

**About TriGeo Network Security**

TriGeo Network Security delivers enterprise security information and event management (SIEM) designed specifically for the needs of the mid-market. TriGeo SIM is the only real-time SIEM appliance that automatically identifies and responds to network attacks, suspicious behavior and policy violations. This award-winning product combines real-time log analysis, event correlation, USB detection and prevention with powerful active response technology. TriGeo SIM is both a unique network defense technology and an "Audit-Proven" compliance solution that meets the security monitoring and log management requirements imposed by PCI, GLBA, NCUA, FDIC, HIPAA, SOX and more.

TriGeo has hundreds of customers across key vertical markets including financial services, health care, government, utility, retail and media/entertainment. TriGeo SIM has won numerous awards including the 2007 SC Magazine Reader Trust Award, the 2007 Gartner Best Execution of a Midmarket IT Solution, and the SC Magazine Best Buy of 2006 award for Event Management. The Company is headquartered in Idaho and is represented by partners nationwide.
