TRIGEO SIM NAMED *SC MAGAZINE* “BEST BUY” FOR THE SECOND YEAR IN A ROW

TriGeo SIM called “a Powerhouse,” Earning a Five Star Rating in Every Category

POST FALLS, ID, October 24, 2006 – TriGeo Network Security, a leading provider of security information management (SIM) solutions, today announced that SC Magazine has awarded TriGeo SIM a “Best Buy” for its power, flexibility and innovation. For the second consecutive year, TriGeo SIM has received SC Magazine’s highest rating in a comparative review of major security information and event management systems.

The TriGeo SIM was recognized for its many features including real-time log analysis, hundreds of pre-built correlations, and IDS/IPS functionality. The review also noted TriGeo’s unique innovations such as USB-Defender™, which monitors and restricts USB mass storage activity, and the product’s depth including extensive network device support and over two hundred stock reports.

The editors wrote, “The TriGeo box is a powerhouse. It is one of the few products we’ve tested over the years that actually lives up to its hype.”

TriGeo’s easy set-up and use, clear and concise reporting functions and its reasonable price were all factors in achieving the Best Buy award. TriGeo earned five star ratings in every category including features, ease-of-use, performance, documentation, support and overall value for the money. The editors found the TriGeo product “simple to use” from the time the appliance was plugged in all the way through day to day management.

“We are thrilled to earn a Best Buy designation two years in a row,” said Michelle Dickman, president and CEO, TriGeo Network Security. “The SC Magazine Group Tests are recognized in the security industry for their independence and thoroughness so this award validates our efforts to set the pace for this emerging market.”

The TriGeo SIM was designed to help mid-market enterprises gain visibility into their organization's network. SC Magazine reports that even large companies can benefit from the performance and functionality of the TriGeo solution. TriGeo helps meet regulatory requirements by providing reporting and analysis that supports the IT security, audit and compliance functions. Real-time security incident analysis and response from the TriGeo SIM makes it ideal for IT security organizations that need fast responses to both internal and external security issues.

About TriGeo Network Security

Formed in 2001 as the pioneer and leader of Automated Remediation through Intelligent Correlation™, TriGeo protects the entire network – from perimeter to endpoint. With more than 40,000 nodes deployed, TriGeo Network Security is the leading provider of information and event management technology for mid-market enterprises.

The TriGeo Security Information Manager is the only network security appliance that automatically identifies, notifies and responds to network attacks, suspicious behavior and policy violations. With patent-pending technology for real-time log analysis, event correlation, automatic alerts and policy-based active response, TriGeo provides an innovative network defense technology through a complete security information management (SIM) solution.

TriGeo is privately-held with headquarters in Post Falls, Idaho. For more information, visit the company's website at www.trigeo.com or call (208) 664-7000
