TRIGEO EXPANDS SCOPE OF SIEM TECHNOLOGY WITH ANNOUNCEMENT OF TRIGEO SIM VERSION 4.0

*TriGeo Redefines the Role of Security Information and Event Management with Enhanced
Network Management and Anomalous Behavior Detection Functionality*

POST FALLS, ID, January 31, 2007 – TriGeo Network Security, a leading provider of security information and event management (SIEM) solutions, announced today that TriGeo SIM version 4.0 will extend TriGeo's lead in active response technology with the introduction of Point and Click Response™ that puts the product's entire response framework at the fingertips of IT personnel. With TriGeo's new Point and Click Response, an IP can be blocked or traffic routed, applications and services can be started or stopped, accounts can be enabled or disabled, privileges can be revoked, machines quarantined or shutdown, and these are just a few of the dozens of actions that empower IT teams to centrally manage both their network and their network security.

"There are dozens of ways the new Point and Click Response functionality makes life easier for IT teams," says Michelle Dickman, president TriGeo Network Security. "Imagine seeing an account lockout in the console, and simply re-enabling the account, or if you detect some inappropriate web browsing, you could send a pop-up warning and even close their browser. These are network management and policy enforcement tasks, but TriGeo has a history of pushing SIEM technology beyond the narrow log aggregation and forensic analysis role of first generation products."

Version 4.0 also expands TriGeo's anomalous behavior detection capabilities with the addition of a Real-Time Flow Analyzer that captures flow data on the wire and in concert with TriGeo's embedded IDS technology. "TriGeo's real-time event correlation has always been a powerful tool for behavior analysis by correlating application, operating system, user and network

infrastructure events,” says Michael Maloof, CTO TriGeo Network Security, “With the addition of real-time flow data IT teams will gain even greater insight into what’s happening on their networks.”

This release will debut at the RSA® Conference 2007 in San Francisco where attendees will be able to see both the new functionality and the product’s expanded feature set. Version 4.0 expands existing functionality by delivering nearly 600 pre-built event correlations, directory service enhancements for identity, change management, event monitoring and active response, over 250 security, network and compliance reports and support for an even broader array of network products and applications.

TriGeo’s SIM targets mid-market companies which face the same network management, regulatory compliance and business continuity challenges of large enterprise networks but without the budget or staff to accomplish this affordably. TriGeo is a recognized leader in this market with two consecutive years of SC Magazine Best Buy awards, a Gartner Midsize Enterprise “Best of Show” award, and multiple editors’ choice awards. TriGeo’s customers get a proven, award-winning product that SC Magazine described as “one of the few products we’ve tested over the years that actually lives up to its hype.”

About TriGeo Network Security

Formed in 2001 as the pioneer and leader of Automated Remediation through Intelligent Correlation™, TriGeo protects the entire network – from perimeter to endpoint. With more than 45,000 nodes deployed, TriGeo Network Security is the leading provider of information and event management technology for mid-market enterprises.

The TriGeo Security Information Manager is the only network security appliance that automatically identifies, notifies and responds to network attacks, suspicious behavior and policy violations. With patent-pending technology for real-time log analysis, event correlation, automatic alerts and policy-based active response, TriGeo provides an innovative network defense technology through a complete security information management (SIM) solution.

TriGeo is privately-held with headquarters in Post Falls, Idaho. For more information, visit the company’s website at www.trigeo.com or call (208) 664-7000
