## **TRIGEO NETWORK SECURITY POSTIONED IN VISIONARIES QUADRANT FOR 2006 MAGIC QUADRANT FOR SECURITY INFORMATION AND EVENT MANAGEMENT**

*TriGeo Evaluated on Vision and Execution*

**POST FALLS, ID, June 5, 2006** – TriGeo Network Security today announced that it has been listed in the “Visionaries” quadrant of Gartner, Inc.’s May 12, 2006 “Magic Quadrant for Security Information and Event Management, 1H06.”

The research, conducted by Mark Nicolett, Amrit Williams and Paul Proctor, examined over 19 organizations and evaluated the vendors based on their ability to meet the increasing need for regulatory compliance as well as their ability to provide real-time awareness of both external and internal threats. The report states that the SIEM market remains fragmented with no dominant vendor.

TriGeo was placed in the “visionaries” quadrant based on an evaluation of the company’s completeness of vision and ability to execute.

“We are pleased to be one of two companies positioned in the visionaries quadrant and view this inclusion as independent validation of our mid-market strategy,” said Michelle Dickman, President, TriGeo Network Security. “TriGeo solves critical compliance and security issues for these organizations, and offers ground-breaking automated-response capabilities. This combination is critical in organizations that don’t have the luxury of 24/7 security operation centers.”

The TriGeo SIM has the unique ability to actively defend the network through highly targeted correlation rules, behavior analysis and integration with network infrastructure. The defensive arsenal includes the ability to quarantine, block, route and control services, processes, accounts and privileges.

The Gartner report defines SIEM technology as delivering two basic capabilities: Security Information Management (SIM) and Security Event Management (SEM). SIM provides reporting and analysis and supports IT security, audit and compliance functions. SEM relates to real-time analysis assisting security incident response and is used by IT security personnel tasked with responding to internal and external threats. The report estimates that 70 percent of current SIEM buyers need both capabilities within a single system.

“TriGeo was designed to provide a balance of both SIM and SEM functions,” added Dickman. “Our mid-market customers deploy TriGeo to meet regulatory requirements, but also to extend their IT staff with a tool that provides network security and network management functions.”

TriGeo targets the mid-market with an award-winning product that combines real-time log analysis, event correlation, USB detection and prevention with powerful active response technology. TriGeo SIM is both a unique network defense technology and an “Audit-Proven” compliance solution that meets the security monitoring and log management requirements imposed by PCI, GLBA, NCUA, FDIC, HIPAA, SOX and related compliance initiatives.

### **About the Magic Quadrant**

The Magic Quadrant is copyrighted 2005 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of the marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant and does not advise technology users to select only those vendors placed in the “Leaders” quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

### **About TriGeo Network Security**

Formed in 2001 as the pioneer and leader of Automated Remediation through Intelligent Correlation™, TriGeo protects the entire network – from perimeter to endpoint. With more than 40,000 nodes deployed, TriGeo Network Security is the leading provider of information and event management technology for mid-market enterprises.

The TriGeo Security Information Manager is the only network security appliance that automatically identifies, notifies and responds to network attacks, suspicious behavior and policy violations. With patent-pending technology for real-time log analysis, event correlation, automatic alerts and policy-based

active response, TriGeo provides an innovative network defense technology through a complete security information management (SIM) solution.

TriGeo is privately-held with headquarters in Post Falls, Idaho. For more information, visit the company's website at [www.trigeo.com](http://www.trigeo.com) or call (208) 664-7000
